video_like_num = models.IntegerField(verbose_name='视频点赞数', default=0)
video_cover_link = models.CharField(verbose_name='视频封面链接',
max_length=128)
```

个人中心奖品表

```
class UserPrize(models.Model):
    student_id = models.CharField(verbose_name='学号', primary_key=True,
max_length=10, unique=True)
    picture_link = models.CharField(verbose_name='图片链接', max_length=128)
    prize_exchange_id = models.CharField(verbose_name='奖品兑换编码',
max_length=128, unique=True)
    get_prize_date = models.CharField(verbose_name='获奖日期', max_length=64)
    prize_name = models.CharField(verbose_name='奖品名称', max_length=64)
```

奖品展示表

```
class Prize(models.Model):
    id = models.IntegerField(verbose_name='奖品id', primary_key=True)
    picture_link = models.CharField(verbose_name='图片链接', max_length=128)
    prize_name = models.CharField(verbose_name='奖品名称', max_length=64)
    detailed_info = models.TextField(verbose_name='奖品详细信息')
    sufe_currency = models.IntegerField(verbose_name='需要sufe币数量')
    address = models.CharField(verbose_name='兑换地点', max_length=128)
```

生涯比赛表

```
class CareerMatch(models.Model):
    student_id = models.CharField(verbose_name='学号', primary_key=True,
max_length=10, unique=True)
    match_id = models.IntegerField(verbose_name='比赛编号')
    match_name = models.CharField(verbose_name='比赛名称', max_length=16)
    match_rank = models.IntegerField(verbose_name='比赛名次', default=0)
    match_date = models.CharField(verbose_name='比赛日期', max_length=64)
```

生涯执裁表

```
class CareerReferee(models.Model):
    student_id = models.CharField(verbose_name='学号', primary_key=True,
max_length=10, unique=True)
    match_id = models.IntegerField(verbose_name='比赛编号')
    match_name = models.CharField(verbose_name='比赛名称', max_length=16)
    referee_date = models.CharField(verbose_name='执裁日期', max_length=64)
```

生涯活动表

```
class CareerActivity(models.Model):
    student_id = models.CharField(verbose_name='学号', primary_key=True,
max_length=10, unique=True)
    ac_name = models.CharField(verbose_name='活动名称', max_length=16)
    ac_date = models.CharField(verbose_name='活动日期', max_length=64)
```
